Dear	

We, the members of Civil Society, join with thousands of signatories of the online campaign 'Support the Social Protection Floor Initiative'

http://www.gopetition.com/petitions/signature-campaign-social-protection-floor/signatures.html.

We urge you to implement a Social Protection Floor programme tailored to our national needs. The priority theme of the 50th Session of UN Commission for Social Development is 'Poverty Eradication'. The Social Protection Floor Initiative is an effective strategy to eradicate poverty.

Everyone has a right to at least basic health services, primary education, housing, water and sanitation. The two necessary elements for the Social Protection Floor are:

- Universal access to social services;
- 2. Social transfers in cash or kind to guarantee income security, food security, adequate nutrition and access to essential services

More than 15 low and middle-income countries have successfully established their Social Protection Floor. We urge you to make this a national priority for our country.

Yours sincerely,
